OBJECTIVE

Graduated with a degree in Software Engineering, having developed practical experience in web development and data analysis through academic projects and hands on internship experience. Eager to apply strong analytical and problem-solving skills to drive impactful solutions and grow alongside a collaborative team.

EXPERIENCE

Co-op Training – Web developer | SCRAMBLEBIT COMPANY | July 2024 – September 2024

- Developed full-stack websites following the SDLC methodology.
- Implemented frontend functionality using modern web technologies.
- Built robust backend solutions with PHP and MySQL.
- Participated in code reviews and sprint planning meetings.
- Collaborated with senior developers on feature implementation.

EDUCATION

Bachelor's Degree in Software Engineering

Okan University | 2025 | Turkey, Istanbul

GPA of 3.1 out of 4

Relevant Coursework: Machine Learning, Database Management, Software Requirements, Agile Methodologies, Web Development, Project Management.

PROJECTS

Guess the word:
Laravel word guessing game built for learning and real-world deployment. Tech: Laravel, MYSQL, Cloud Laravel.
Check out the live website

Coffee bean data analysis:
A Power BI dashboard analyzing coffee bean sales in Saudi Arabia (2023, 2024). It explores sales trends, customer behavior, product performance, and the impact of discounts across five coffee types.
View The Dashboard

Telco Customer Retention Dashboard:
Developed an end-to-end Power BI solution to identify churn drivers, revealing that Senior Citizens churn at double the average rate (41.7%).

Created a High-Value At-Risk priority list to help retention teams target customers with the highest revenue leakage.
Tech: Power BI (Power Query, DAX, Data Modeling).
View The Dashboard

Graduation Project: Car Parking System: Designed and developed a Car Parking System enabling users to reserve parking slots online and securely access the facility using QR code authentication.
Tech: PHP, MYSQL, JAVASCRIPT.

OTHER

- **Active Member: Saudi Council of Engineers (SCE)** 2026 - 2027

- **Courses:**
  - **Databases and SQL for Data Science with Python** | IBM | August 2025
  - **Python for Data Science, AI & Development** | IBM | July 2025
  - **Data Visualization and Dashboards with Excel and Cognos** | IBM | May 2025
  - **Excel Basics for Data Analysis** | IBM | April 2025
  - **Introduction to Data Analysis** | IBM | March 2025

- **Skills**:
  - Programming Languages: Python, PHP, JavaScript
  - Databases: MySQL
  - Web Technologies: HTML, CSS, Bootstrap
  - Software Development Life Cycle
  - Data Analysis Tools: Excel, Power BI & SQL
  - Agile Methodology
  - Version Control: Git & GitHub
  - Data Preparation and Visualization
  - Attention to Detail
  - Problem Solving
  - Time Management
  - Analytical Thinking
  - Adaptability
  - Team Collaboration
  - Critical Thinking
